SUMMARY:

Full Stack Developer with 1+ year of hands-on experience building B2B CRM and E-commerce platforms using the MERN stack (React.js, Node.js, Express.js, MongoDB). Skilled in developing secure authentication systems, role-based access control, RESTful APIs, and interactive dashboards with Chart.js. Proven ability to write clean, scalable code and optimize application performance. Seeking a Full Stack Developer role where I can leverage my MERN stack expertise to build scalable web applications.

PROJECTS :

SmartLead CRM | React.js, Node.js, Express.js, MongoDB, Bootstrap **Apr 2026 - May 2026**

- Built a full-stack CRM system from scratch, managing 50+ leads with complete CRUD operations (Create, Read, Update, Delete).
- Implemented JWT-based authentication and role-based access control, allowing 3 user types (Admin, Manager, Agent) to securely access leads.
- Reduced lead search time by 30% by implementing real-time filtering, sorting, and search functionality using REST APIs.
- Developed 5+ reusable React components using Context API and custom hooks, making the codebase more maintainable and reducing development time by 25%.
- Integrated Chart.js to create an interactive lead distribution dashboard, saving 3 hours of manual reporting per week.

ModernMart Ecommerce | React.js, Node.js, Express.js, MongoDB, Bootstrap **Feb 2026 - Mar 2026**

- Built a full-stack e-commerce platform with 15+ products across 5+ categories, featuring product listing, category filters, and price sorting.
 - Implemented shopping cart with quantity management (add/remove/update) and wishlist functionality for saving favorite products.
 - Developed address management (add/update/delete) and checkout flow with order summary, processing 10+ test orders.
 - Integrated search functionality with real-time results and toast notifications for all user actions.
